### **DETAILED ACTION**

Claims 1-66 are pending in the present application.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-52 and 60-66, drawn to a method of cloning, classified in class 435, subclass 91.1.
- II. Claims 53-59, drawn to a method for transformation of a vector by a nucleic acid insert, classified in class 435, subclass 455.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are different methods, which comprise different method steps such that one is not capable of use with the other. Group I and Group II comprise different method steps such that searching each method would be unduly burdensome. Moreover, each of the present inventions is separate and distinct such that each is separately patentable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. The search required for Group I is not required for Group II such that restriction is proper.

***Conclusion***

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
